

QUIZ # 1

Name: _____

Reg #: _____

Question1:

Write a JavaScript function that merges two arrays and removes all duplicate elements.

Question 2:

Write a JavaScript function to remove a specific element from an array.

Question 3:

Write a JavaScript function that generates all combinations of a string.

Example string: 'dog'

Expected Output: d,do,dog,o,og,g

Question 4:

Write a JavaScript program to list the properties of a JavaScript object.

Question 5:

Write a JavaScript function to truncate a string if it is longer than the specified number of characters. Truncated strings will end with a translatable ellipsis sequence ("...") (by default) or specified characters.

Question 6:

Write an array function to return the sum of indefinite numbers.
